

V-JEPA-based predictive navigation for indoor PointNav

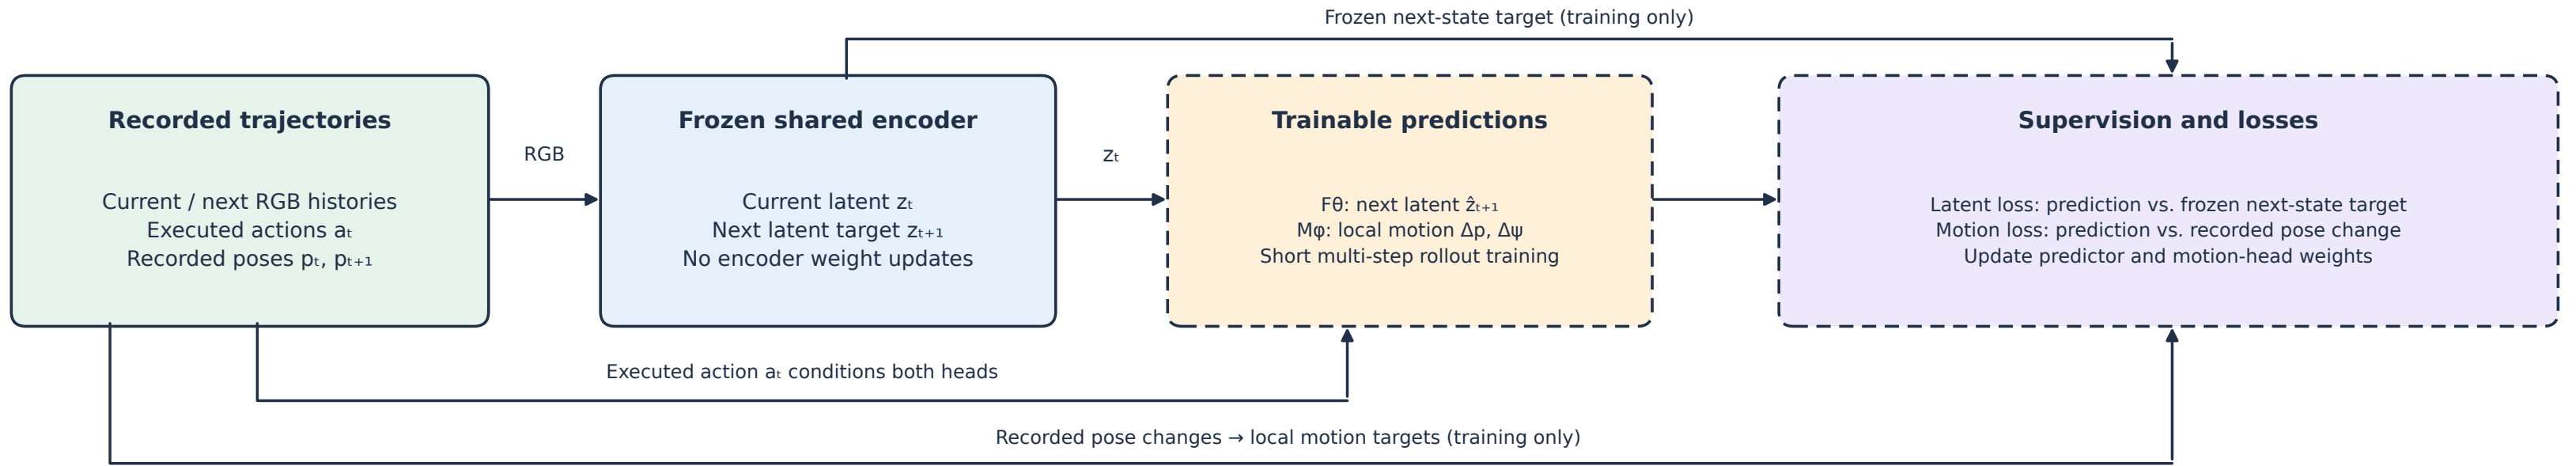

A Deployment · observe, predict, choose one action, repeat

Action set: FORWARD (0.25 m) · TURN_LEFT / TURN_RIGHT (15°) · STOP

Future states are predicted by the model; no future simulator queries, map input or expert path at deployment.

B Training · learn from recorded transitions

Blue: frozen weights | Orange: learned modules | Dashed border: proposed component / extension

Proposal policy: separate behavior-cloning supervision
